

Second Opinion?

How about a third, fourth, fifth, sixth...

It's often said, "Great Minds Think Alike." But at **Sarasota Memorial's Breast Health Center**, we believe a bit of healthy debate ensures the best care for our patients. Because the best minds in medicine realize that no two women are alike, that every tumor is as unique as a fingerprint, and that there may be more than one right way to treat your cancer.

Breast cancer experts from various fields – breast cancer and reconstruction surgeons, radiologists, pathologists, radiation and medical oncologists, and other specialists – meet regularly as a team to review new cases. They analyze test results, discuss treatment options, share the latest research findings ... and most importantly, reach consensus on the best approach to beat each specific kind of cancer.

Our Breast Health team is available to help answer any questions you have about your diagnosis and guide you through your tests and treatment. To learn more, call us at (941) 917-3377 or visit our website at smh.com.
